ALMANAC

1875

# ASTRONOMICAL CALCULATIONS FOR 1875.

Compiled expressly for Clarks' Cleveland Almanac, by SAMUEL H. WRIGHT,  
A. M., Penn Yan, Yates Co., N. Y.

## ECLIPSES FOR 1875.

There will be two Eclipses this year:

- I. A Total Eclipse of the Sun, April 6th. Invisible in the United States.
- II. An Annular Eclipse of the Sun, September 29th. Visible in Africa and South America.

At all places in the United States east of the Mississippi Valley, the Sun will rise more or less eclipsed. The eclipse will be annular, or ring-like, from Sodus Point, on the south shore of Lake Ontario, Lyons, Oswego, Syracuse, Utica, Saratoga, and northern Massachusetts, to the ocean.

Along the path of the central eclipse the size will be  $11\frac{1}{2}$  digits. At Cleveland the eclipse will end at 6 o'clock 45 minutes in the morning. Its greatest size will be 10 digits.

### MORNING STARS.

Venus until September 23.  
Mars until February 26.  
Jupiter until January 20.  
Saturn from February 5 to May 16.

### EVENING STARS.

Venus after September 23.  
Mars after February 26.  
Jupiter from Jan. 20 till Nov. 4.  
Saturn until Feb. 5 and after May 16.

## CHRONOLOGICAL CYCLES FOR 1875.

Dominical Letter..... C | Solar Cycle..... 8 | Roman Indiction..... 3  
Epact..... 23 | Golden Number..... 14 | Julian Period..... 6588

## PLANETS BRIGHTEST.

Mercury, February 10, June 6, and October 3, setting then soon after the Sun; also, March 31, July 30, and November 18, rising then a short time before the Sun. Venus, January 12. Saturn, August 15. Mars, June 20.

### THE FOUR SEASONS.

	D.	H.	M.
Spring begins ar.	20	6	54 Eve.
Summer begin June	21	3	20 Eve.
Autumn begins Sept.	23	5	47 Morn.
Winter begins Dec.	21	11	49 Eve.

### EMBER DAYS.

February	. . . 17th, 19th, and 20th.
May	. . . 19th, 21st, and 23d.
September	. . . 15th, 17th, and 18th.
December	. . . 15th, 17th, and 18th.

## PLANETARY AND OTHER CHARACTERS.

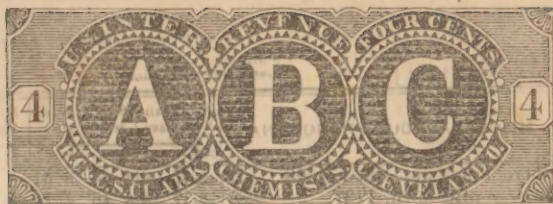

☉ The Sun.	♃ Jupiter.	☾ First Quarter.
☿ Mercury.	♄ Saturn.	☼ Full Moon.
♀ Venus.	♅ Uranus.	☾ Last Quarter.
♂ Mars.	♆ Neptune.	● New Moon.

♊ Conjunction, indicating that the two bodies appear nearest each other at the time expressed. ☿ Opposition, indicating that the two bodies appear at greatest distance from each other, one rising while the other sets. ☐ Quartile, indicating that one body is overhead while the other is rising or setting.

## SIGNS OF THE ZODIAC.

♈ Aries, Head.	♌ Leo, Heart.	♐ Sagittarius, Thighs.
♉ Taurus, Neck.	♍ Virgo, Bowels.	♑ Capricornus, Knees.
♊ Gemini, Arms.	♎ Libra, Reins.	♒ Aquarius, Legs.
♋ Cancer, Breast.	♏ Scorpio, Secrets.	♓ Pisces, Feet.

Above is a slightly enlarged *fac-simile* of our new proprietary internal revenue stamp prepared for us by the United States government. It is an absolute guaranty that the medicine is genuine. The government will sell those stamps to none but us. Our Anti-Bilious Compound is in panel bottles, having our name blown in the glass. Around each bottle is a wrapper, the outside of which is printed in English, German, and French. On the bottle thus wrapped, our proprietary stamp is pasted, after which the bottles are tied in packages of half-dozen each.

There can not be a counterfeit bearing that stamp; and without it the preparation is spurious. If our readers know of an attempt to counterfeit our Compound, we hope they will report the matter to us at once. The rascals who did some time ago attempt to counterfeit the medicine, and to represent themselves as members of our firm, carried certain extracts with which they pretended to make any amount of our Compound their victims might want. That parties may not be imposed upon again in that manner, we will state that we employ no agents, and that our Compound can not be made by mixing any extracts in existence. It owes much of its astonishing curative powers to the method of its preparation.

The necessity for a preparation like ours lies in the perversity of man's nature. If the laws of health were fully regarded, many years would be added to man's life, and disease would scarcely be known. Even in this day of carelessness and transgression, we occasionally hear of a person who, by strict attention to health, has lived to a ripe old age. Yet these rare individuals do not live so long as they might, had not the errors of their forefathers entailed upon them an impaired and delicate constitution.

In his present condition man may enjoy much better health, and greatly prolong his life, by the requisite attention to the demands of nature, studiously avoiding whatever tends to derange the functions of the vital organs. When any derangement in health is discovered, no time should be lost in correcting such derangement by giving health to the stomach and liver, and by purifying the blood. This is more effectually done by our Compound than by any other medicine in existence. We make this assertion without the possibility of a successful contradiction.

MR. CODDINGTON has a horse which seems to care little what kind of fences divide the neighbors' farms from his master's. When he wishes to taste green oats, or to exercise a neighbor's cattle, he hops over the fence and proceeds to business. Mr. Coddington was one day asked the pedigree of his horse. He replied that he was sired by an African zebra and dam-ed by all his neighbors.

ADRIAM LYTLE was engaged to Susan. Susan's friend one day desired to know if she was really going to marry "Yes," said Susan, "I am going to marry A. Lytle."

In time of prosperity friends will be plenty,  
In time of adversity not one among twenty.

A MAN arrested for being drunk, when asked his business, said he was a sculpture—he had just been executing a bust of himself.

MATILDA describes a married widower as a man warmed over.

A MAN who thought he had been grossly misrepresented by one of the company, asked the traducer if he would take offense if compared to a lilac. "Why, certainly not." "Then, sir, you lilac (lie like) a villain."

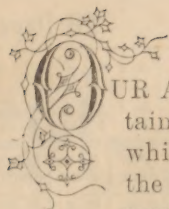

How is a bill-poster like a printer? He frequently puts up advertisements in a-pale.

SAY well and do well end with one letter,  
SAY well is good, but do well is better.

# WHAT OUR MEDICINE IS

---

OUR Anti-Bilious Compound is entirely vegetable. It contains the most energetic and harmless medicinal agents which medical science has yet discovered for cleansing the blood and giving tone to the stomach and liver. The combination has been as carefully studied as the remedial agents themselves. They are combined in such manner as to give the utmost curative power to their combined tonic and alterative action. The Compound has been prepared with special reference to diseases of the present day, and to the change which time has wrought in the character of constitutional disease.

When we offered a reward for a preparation which could cure one-half as many liver, stomach, and blood diseases, we made the offer in good faith, and hoped some person would accept our challenge. The challenge is still open, and the superiority of Clarks' Anti-Bilious Compound still undisputed.

All diseases can not be cured by one medicine, but *diseases arising from similar causes require similar treatment*. While we do not claim that the Anti-Bilious Compound will cure all diseases, we do claim that it will cure all diseases which can be cured by cleansing the blood and restoring to healthy action the stomach and liver. We do not recommend it for a single disease that it has not already cured. All who have used it (physicians as well as others) join in asserting that it is unequalled, and far above successful rivalry, for diseases of the liver, stomach, and blood.

If you doubt the value of this medicine, write to those who have been cured by it, and await their reply. See what eminent physicians say, who are using it in their practice. Find one person, if you can, who has ever used our Compound, who will not testify to its merits. We have constantly confined ourselves to the plainest statement of facts, and we challenge any person to find a single assertion made by us which we can not substantiate by affidavits.

Reader, if you are afflicted with any of the diseases for which the Anti-Bilious Compound is recommended, be entreated to give it an impartial trial. If your friends are thus afflicted, advise them to try it. If you know of any case which has baffled medical skill, get this medicine tried thoroughly, if possible. If your druggist does not keep it, request and insist upon his getting it for you. Do not be put off with any other preparation as a substitute, but insist upon his ordering Clarks' Anti-Bilious Compound.

----	----	-----	------------------------------	---	------	------	-------	------	------

A STREET vender of some pain-curing medicine took occasion at a dinner-table to speak of the merits of his medicine. A lawyer at the table felt annoyed by the prominence of the quack professor, so he mildly asked: "In what manner, sir, do you chiefly advertise?" Not at all cut by the gentle reference, the professor declared that he sometimes took to the street corners and preached to the multitude; but he frequently leased a hall and played the role of Murdock. "Stop," said the lawyer; "if there is Burdock in it, we know it is good."

MR. ANGEL had a great desire to try his luck at fishing. Knowing little of the modes of catching fish, he returned with only a small string of minnows (pronounced minny by fishermen). The boys from that day applied to him the title of *minny string Angel*.

A CLEVELAND schoolm m told a pupil if he did n't take care she would take hair.

LAWS catch flies, but let hornets go free.

IN Crawford Co., Pa., many years ago, two physicians who were worn out by constant care and wakefulness attending a family of sick children, lay down on the floor with their pillows under their heads, to get some rest. A woman, who was helping care for the children, made bitter complaints of the lack of mental strength with the attending physicians. Finally the elder M. D., aroused from his partial slumber, produced arguments to prove his judgment and erudition. He closed by saying that the medicine used had been the standard remedy for that disease since the days of Hippocrates. He unfortunately pronounced the name Hip-po-crates instead of Hip-poc-ra-tes. "Well," said the woman, "I should think, from the way these children die and the stuff used for medicine, that we are now living in the days of hippocrides."

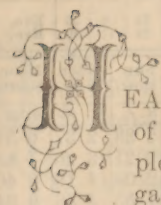

HE that will thrive must rise at five; he that has thriven may lie till seven.

A DRY cough is the trumpeter of death.

## THE STOMACH.

HEALTHY digestion must not be expected unless food is of proper quality, taken at regular intervals, and completely masticated before it passes into the stomach. The gastric fluid, in a healthy stomach, converts the food into a creamy substance called *chyme*, in which condition it passes into the duodenum (upper part of the small intestine), where, by action of the bile and pancreatic juice, the mass is modified and separated into excrementitious matter, to be carried away by the intestines, and *chyle*, a milky substance, containing all the essentials for rebuilding the human system.

Through the mediums of the lacteals and thoracic duct this chyle is conveyed directly to the blood, of which it thenceforth constitutes a part, to circulate through every tissue of the entire organism. Perhaps some of our readers have never thought how largely the condition of the blood depends upon the digestive organs. Soon after digestion begins, nourishment from the digested food pours constantly into, and becomes part of, the blood. As unhealthy chyle, manufactured by a diseased stomach, pours seeds of disease into the blood, it becomes of vital importance that the organs manufacturing new blood be enabled to supply a fresh stock of it, free from disease. To give health and power to the stomach and liver, no other preparation is equal to our Compound.

If the stomach, from overwork, has become stupid and will not demand the food required to support the system, a dose of Compound, taken just at meal time, will mildly encourage the appetite and facilitate digestion. If there is no lack of appetite, but a lack of power in the stomach to digest food, a dose of Compound, taken just after a meal, will give the stomach power to digest the food and leave it in a healthy condition to rest and recuperate for the next meal.

I had been sick four years, took medicine all the time, and grew worse. The doctors who saw me said I could not get well. My disease was in my stomach and lungs. I could eat very little; could not lie on my left side, nor have my hands on me when lying on my back, on account of soreness across me. I kept my bed nearly all the time till I commenced taking your medicine. After being almost helpless for two months, I improved rapidly, and can now walk anywhere. I believe your Compound is the best medicine that was ever made.

Miss JENNIE JACKSON, Fair Haven, O.

Gentlemen: I have used your Compound in my practice for the past three years with marked success. While it has proved itself a valuable medicine in liver diseases, and as an invigorator of the nervous system, it has been remarkably successful in diseases of the stomach, giving strength and appetite when other medicines had failed. So far as I know, it has not, in a single instance, failed to do all you claim for it.

A. B. CUSHMAN, M. D., Sutton's Corners, Pa.

A CONTRACTOR boasts that his single head keeps more than a thousand operatives constantly employed. A fine-tooth comb is suggested.

A MISSIONARY approached a young sprout with "Young man, have you ever found the Lord?" "No, massa, really I hab n't; am the Lord lost?"

WHEN a room is full of smoke and we raise a window, where does the smoke go? Into our eyes.

OUR readers are aware that a U. S. Senator not long ago resigned his seat in the Senate because he feared expulsion from that body. We suppose he had determined that in a time of such misfortune he would be resigned.

STRETCH your legs according to your coverlet.

AFTER dinner Blake inquired of his guests if they would like to see some white hares which his English friend, T—, had sent him. Knowing T—'s great fondness for rabbits, the company unanimously desired to be shown the rare specimen at once. Blake conducted the company to a lawn, where they discovered a large box with many cords protruding from under it. Blake directed each to hold a cord to prevent escape when he would lift the box. When each guest had secured his cord by a turn around his wrist, and had placed his eyes intently on the box, Blake lifted it, and lo! the cords were attached to horse hair.

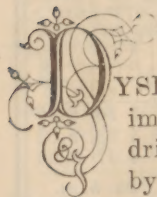

THE early bird catches the worm; but the worm had no business to be out so early.

A PRINTER imitates a cross child when he slings long primer.

## DYSPEPSIA.

---

DYSPEPSIA is caused by overtaxing the stomach, and impairing its normal action, by eating indigestible food, drinking stimulating bitters and liquors, using tobacco, by extreme mental or physical labor, sedentary habits, or whatever renders the stomach unable to properly dispose of its contents.

Once seated, the tendency of dyspepsia is from bad to worse, till it breaks down and shatters the whole constitution. When a dyspeptic stomach is supplied with food which it is unable to digest, the food irritates and inflames it, is expelled into the intestines, and carries its injurious effects quite throughout the intestinal canal. In its course it causes sourness of stomach, acid eructations, chronic diarrhoea, and other diseases of the stomach and bowels. By its action upon the nervous system, it causes dyspeptic dreams, headache, nervous excitability, melancholy, etc., etc. Unhealthy chyle, prepared by this process, when poured into the blood, produces many maladies, known as diseases of the blood and skin.

When diseased, it is of great importance that the stomach be immediately restored to its normal condition. How shall this be done? Certainly not by drinking spirituous "bitters" by the wine-glassful, to stupefy the stomach, so that it may be filled with food which it is unable to digest, nor by using bitters prepared in acid of any kind.

We have the cure in Clarks' Anti-Bilious Compound, a purely vegetable, mild, energetic medicine, designed especially for diseases of the stomach, liver, and blood. It will positively cure dyspepsia. It has never failed in a single instance. We offer a reward of *fifty dollars* for a case of dyspepsia which it will not cure.

The following is from Rev. L. B. Caldwell, of this city:

*Sirs:* For years I have been troubled with dyspepsia, and have suffered from many of its attendant irritations, such as depression of spirits, loss of appetite, and loss of sleep. Some months since I commenced using your Anti-Bilious Compound, and have found great relief. In my case it has wonderfully stimulated my nervous vitality. My food relishes much better, and I sleep well. I am still using your medicine, and am glad to be able to volunteer this commendation.

Very truly,

L. B. CALDWELL.

I had been afflicted with dyspepsia for twenty years. I tried numerous remedies without relief. I was at last induced to try your Anti-Bilious Compound, and after using five bottles I find my appetite better, health improved, and do not have those distressing, harassing feelings after eating with which I had been afflicted for so many years. I hope my fellow-men, who have been afflicted as I have been, may avail themselves of the relief offered them through your remedy.

Yours truly,

DANIEL GOULD, Rimer, Pa.

Brown, who had quarreled with Jones, desiring revenge, printed "Sneak Thief" on a card and attached it to the front door of Jones's residence. When Jones discovered it he sent a note to Brown thanking him for his call, and requesting him, when he called again, to come in instead of leaving his card.

MATCHES are made in heaven, but we have seen matches which looked as if they had also had a touch of brimstone.

"Don't stand on ceremony," said Hutchins to a stranger who was ringing the door-bell, when the door was open. "Ah, beg pardon," said the stranger, as he stepped aside, "I thought it was a mat I was standing on."

THE title of a new book is "Mellifluous Mol-lie, or the Musical Meanderings of a Milwaukee Musician."

A MAN bought, at great price, an elaborate picture of a glacier, but, as there appeared to him a few places where the representation of ice might be improved, he engaged an artist to touch it up. He did not seem satisfied with the artist's efforts. Some change was suggested, and some fault found, every day. Finally, tired, discouraged, and provoked, the artist obliterated the whole picture and *lit out*, after leaving a card on which was penciled: "You will see the ice is melted and gone. It is useless to attempt to do any thing with the picture till the weather gets colder."

THE marriage of a Flat and a Sharp, we think, must be any thing but natural.

NOTHING must be done hastily but the killing of fleas.

FLATTERERS make cream cheese of chalk.

## LOSS OF APPETITE.

**D**ISEASED appetite is a symptom of dyspepsia. The stomach usually asks, with regularity, for substantial food in moderate quantities. When weak, it frequently indicates its disgust for food which it can not properly take care of. In this condition the thoughtless will imbibe "bitters" or liquors by which the stomach is inflamed and rendered insensitive to its normal wants. It will crave any thing and every thing to relieve inflammation. The "bitters" men will tell you this inflammation of the stomach is "appetite." Burn your mouth with a hot drink, or inflame it with pepper, and you have a fair illustration of that sort of appetite. Why not as well call such a burn "appetite" as when the burning is in the stomach?

If your stomach is weak, and you have no appetite for food, you must let spirituous and acid bitters entirely alone. Strengthen your stomach, and true appetite will return. If the stomach is very weak, take small doses of the Compound, perhaps less than a teaspoonful, gradually increasing the dose as the stomach is able to bear it without distress, until you can take a full dose.

We warrant the Anti-Bilious Compound to give a good appetite. **Water Brash.** When the stomach is diseased, the salivary glands of the mouth may secrete too little or too much. When the quantity is in excess it is swallowed into the stomach, where it accumulates and is finally thrown up, mingled, perhaps, with acids contained in the stomach. This is permanently cured by taking the Compound till health is restored to the stomach.

**Heartburn, or Sourness of Stomach,** is a symptom of dyspepsia. It troubles only till the healthy operations of the stomach are restored. Take a small quantity of magnesia to correct the immediate acidity, and take the Anti-Bilious Compound to strengthen the stomach.

See what the master painter of the L. S. & M. S. Ry. shop say :

317 LAKE STREET, CLEVELAND, O.

MESSRS. R. C. & C. S. CLARK—

*Gentlemen:* For ten years I had sourness of the stomach, pain in the pit of my stomach and bowels. I thought, too, that my lungs were diseased, because at times I could hardly breathe. I tried a great many medicines, but was not helped by them. The sour stuff would come up from my stomach worse and worse, till I began to take your Anti-Bilious Compound. Your medicine has entirely cured me. I do not now have cramps and pain in my stomach, nor sourness of stomach. Since it cured me I have recommended it to others, always with fine results. One lady to whom I recommended it had palpitation of the heart, and was otherwise feeble. It cured the palpitation and gave her strength.

Very truly,

CHARLES REIBLEIN.

CADMUS followed a cow to see where she would lie down. He there founded the city of Thebes. Such a circumstance seems a trivial reason for founding a city on that site, but some recent writers claim that the city of New York was first begun where the cows went to the river to drink; and as good authority as the venerable Diedrich Knickerbocker declares that the crooked cow-paths away from that drinking-place marked the roads of the settlers, who built their houses on either side of those paths, which afterwards became the streets and thoroughfares of that great city, without at any time being changed from their original irregular course. A glance at the streets of that city will go far to corroborate this item of history.

A LYMPHATIC gentleman, of nearly three hundred pounds weight, occupied so much space that he always bought two seats for himself when he wished to attend the opera. One day he sent a servant to procure seats for the evening performance. He returned with the intelligence that, as he could not get two seats together, he had bought a seat on each side of the central aisle.

IN marrying the daughter of a millionaire, it is some satisfaction to know that you are going to have your hair pulled by a *hairstress*.

A GREAT thief has just broken into a house. What house? A prison-house.

God help the rich; the poor can beg.

## SICK HEADACHE.

**G**REAT sympathy exists between the stomach and brain. We may sit down hungry to a delicious dinner, when the receipt of important news may produce a mental shock which will entirely take away our appetite. Again, when we are engaged at some hard mental work, if we eat a full dinner, and resume our work at once, the chances are, that we will fall asleep at our work. The stomach is more sensitive at one time than at another. If a weak stomach is slightly overloaded or forced to receive indigestible food on a day when, from mental disturbance or some other cause, it is unusually feeble, the result will most likely be diarrhoea or sick headache. If the undigested mass can readily pass off, the brain is likely to escape, but usually sick headache has to be endured for a time, and is finally relieved by copious stools, either the result of cathartic medicine or diarrhoea.

Clarks' Anti-Bilious Compound, by restoring the stomach to its full power, enables it to digest the food, and thereby prevents sick headache. We will give *twenty-five dollars* for a case of sick headache which our Compound will not cure. We, of course, can not, during treatment, allow that stomach to be filled to its utmost capacity with indigestible food.

R. C. & C. S. CLARK. *Gentlemen:* I am now fifty-two years old; have been constantly employed in the ministry for thirty years—much of the time as an Evangelist. I have always been afflicted with hereditary sick headache; mother before me had it severely up to the time of her death, at the age of seventy-four. I have had it about one-tenth of my life; have had it much more in cold than in warm weather, the action of the liver has been sluggish. I took two or three bottles of your Compound in the summer of 1873, and it relieved me much. I commenced taking your Compound regularly about six weeks ago; have taken six bottles; general tone of health much improved, vitality increased; am not entirely cured, but may safely say I do not suffer with headache more than one fourth as much as before I commenced taking your medicine. I am hopeful that its use awhile longer will effect a permanent cure; have tried many remedies during the years past, but none of them began to have the happy effect yours has. There is so much humbuggery in patent medicines that I had little confidence in years till I tried it. I am satisfied your Compound is a *real medicine*.

M. H. ABBEY, Hillsdale, Mich.

I have used several bottles, and think it has done me more good than any other medicine I ever used. I have no headache, have a good appetite, and feel well.

Yours truly,

WALLACE LOOK, 468 St. Clair St., Cleveland, O.

I recommended it to a friend for sick headache, and she thinks she received greater benefit from it than from all other remedies which she had ever used.

Yours truly,

N. W. BROWN, Forestville, N. Y.

R. C. & C. S. CLARK, Cleveland, O. *Gentlemen:* I have suffered a great deal from sick headache and a debilitated condition of the system. I have found your Compound an agreeable remedy and a positive cure. I would therefore recommend it to the public.

Mrs. PHEBE BABCOCK, Toledo, Iowa.

Your Anti-Bilious Compound is regarded by some of my customers as a *specific* for sick headache.

F. M. WHALLON, Druggist, Mayville, N. Y.

One man told us that he could give or sign a certificate that a few bottles of the Compound had done more for him than all other medicines he had used.

J. W. WILLIAMS & SON, North Manchester, Ind.

A YOUNG man escorted his intended to a stage-coach for a twenty mile ride. He found only one vacant seat inside, and that was beside his rival. He had to seat his huckleberry there, and take himself a seat with the driver. Blazes! wasn't he mad! It was sad.

A DRAYMAN lost a wheel in the street, much to the annoyance of a lady whose carriage was stopped by the broken vehicle. "The deuce take your dray!" exclaimed the lady. "Not according to Hoyle," said the drayman; "a deuce can't take a trey, but it may count one for low."

Is it not singular how Belgium can feel friendly toward other nations when Brussels is trodden under foot by the people of every civilized country.

He that leaves certainty and sticks to chance, When fools pipe he may dance.

A SCARLET nose is not an indication that the owner is otherwise deep read.

TWO MEN slipped on the ice and fell. One said: "We fell simultaneously." "Maybe you did, but I didn't. I fell tumultuously."

A MAGIC-LANTERN exhibitor of Bible scenes engaged a raw musician. He instructed him to execute such music as he thought would be appropriate to follow each illustration. So when he exhibited Pharaoh in the Red Sea, his musician struck up "Life on the Ocean Wave."

WHEN a boy gets on his white pataloons and goes to church in the school-house, he is sure to receive a superabundance of affection. The chew of gum which a wicked boy purposely left in the seat sticks to him, and when he gets home his mother takes a stick to him.

HONEY is sweet, but the bee stings.

# CHRONIC DIARRHŒA.

**RESTORE** healthy digestion and intestinal action, and you have removed the cause of chronic diarrhœa. Undigested food, or an excessive amount of bile, passing along the intestinal canal, will irritate the mucous surface, causing it to throw out a large amount of mucus and produce diarrhœa. If this irritation is continued or frequently repeated, chronic inflammation of the mucous surface will ensue, and chronic diarrhœa will follow. Ulceration may also take place, and the intestinal condition grow constantly worse until death finally relieves the emaciated suffering victim.

Strong astringent medicines will check the discharge, and are therefore sometimes used by those unacquainted with the consequences. This practice can not be too strongly condemned. The forced presence of such putrid matter may cause acute inflammation internally and result in death. A medicine which will act as a tonic to the intestines, while it does not clog them up, and one which will correct whatever irregular action there may be in the stomach and liver, will quite rapidly induce normal stools and regulate their frequency and copiousness.

Clarks' Anti-Bilious Compound is unquestionably the best medicine with which to accomplish that purpose. It will cure any case of chronic diarrhœa which is not absolutely incurable.

**Pin-worms or Thread-worms.** It is impossible for a person who has never been afflicted with these detestible parasites, to appreciate the unpleasant nervousness and other disagreeable symptoms usually attending the existence of these lively worms. Their presence is due to a diseased condition of the mucous membrane of the large intestine. Such diseased condition may have been induced by contact with abnormal poisonous matter from a diseased digestive apparatus. The debilitated mucous surface facilitates the production of these worms. They in turn still further disease the mucous surface, causing by their activity an irritation which inflames the mucous membrane. An inflamed mucous surface secretes mucus rapidly to protect the inflamed surface; hence the slimy stools usually present when thread-worms are active.

The rational cure is to regulate digestion and tone up the mucous surface, thereby cutting off their food supply. They can not subsist on the secretion of a healthy mucous surface. Clarks' Anti-Bilious Compound, by regulating digestion and the intestinal canal, will remove thread-worms and most other internal parasites.

For twenty or thirty years I was greatly troubled with pin-worms. I believe they have left me entirely, and I believe it was your compound that drove them away. If you want to make use of this for the benefit of others, I hereby authorize you to do so.

N. W. JONES, Nunda, N. Y.

CHICK says his constitution has become badly shattered, but he hopes to get an amendment to it by the use of Anti-Bilious Compound.

SOME people have a habit of thoughtlessly rubbing their hands together when they do not know what else to do with them. Hood describes the action as washing their hands with invisible soap, in imperceptible water.

WHEN Dobbins was chased out of a lot by a cross bull, he concluded it was "a bull of ex-communication."

FANNIE's sewing-machine to-day made one more stitch than it was recommended to do. That stitch was in her side.

WHEN is misfortune out of place? When it is in everybody's mouth.

BAREFOOTED men should not tread on thorns.

MINX, in his travels, found two peculiar species of frogs. One would hop over the ground faster than a man could run, and the other weighed several hundred pounds. The first he discovered in a horse's foot, and the other at a railroad siding.

BRIDGET could not get the fowl boiled in time for dinner. After great delay, her mistress inquired why it was not yet done. "Sure," said Bridget, "an I think the bird must have taken Anti-Bilious Compound; it is so tough and there does n't seem to be any bile (boil) in it at all."

An evidence that the United States occupy an elevated position is, the flag is *bunting* among stars.

THE convicted thief, like the running vine, tries to climb the prison walls.

# THE LIVER.

THE liver is the largest and one of the most important organs in the human system. The foul, morbid matter absorbed from the various tissues by the blood, is taken therefrom by a healthy liver and converted into bile, which is conveyed to the duodenum, where it unites with *chyme* (partially digested food), completes digestion, and separates the mass into refuse matter, to be conveyed away by the intestines, and *chyle*, a milky substance, which enters immediately into the circulation, and carries to every part of the system those elements needed to sustain a healthy growth. As the chyle can be pure only when the stomach and liver are healthy, and as the blood can be pure only when replenished with pure chyle, it is of vast importance that the liver and stomach be kept healthy.

**Liver Complaint.** Diseases of the liver are far more prevalent than many people suppose, especially in sections of the country where newly upturned soil and decaying vegetation exhale poisonous malaria, and where the temperature and humidity of the atmosphere undergo frequent and violent changes. Even the lower animals, where we seldom find disease, can not escape the pernicious effect of climate upon the liver, evidence of which is shown by an examination of livers at a slaughter-house.

As the purity of the blood depends greatly upon the health of the liver, it becomes of pre-eminent importance that this organ be kept up to its highest possible limit of health and power. It was with the fullest appreciation of such great importance of the liver, that Clarks' Anti-Bilious Compound was designed and prepared. Its unparalleled success in curing diseases of the liver, is sufficient proof that we have not overestimated its efficiency and power.

In whatever way the liver may be diseased, the Anti-Bilious Compound, by its mild yet powerful and prompt action, opens all natural channels for a proper excretion of bile, corrects its secretion, and sets the whole machinery in good working condition. We offer a reward of *fifty dollars* for a case of liver disease which our Anti-Bilious Compound will not cure.

For years I was afflicted with chronic inflammation of the liver and spleen. I felt very weak, had an intense burning heat in my side, and pain in my back whenever, from exercise, I became tired. I took your Compound and was completely relieved. Yours, etc., CEPHAS BIXBY, Le Roy, Minn.

There is a lady here who had liver complaint and rheumatism. She was given up by physicians but was in a measure restored by your Compound.

L. C. PETERS, Fleming, Centre Co., Pa.

THE foremost dog catcheth the hare.

## BILIOUSNESS.

**B**XCESSIVE secretion of bile is what is usually understood by the term bilious. The secretion is morbid and irregular. For a few days there may be copious secretion, causing diarrhoea, and possibly vomiting of bile, followed, for a brief interval, by deficient secretion and consequent constipation. There will most likely be pain in right side, drowsiness, with frequent headache (see Nervous Headache), unsteady appetite, yellow color, and dryness of skin, bad taste in the mouth, coating on the tongue, etc.

Inhabitants of warm countries are more frequently bilious than those of a higher latitude. There is more biliousness in summer than in winter. This bilious condition indicates unhealthiness of the liver, which, if allowed to progress, may so involve that organ that a much greater length of time will be required to restore it to its original health and power. It is rash folly in such a case to neglect the use of our Compound, which is known to restore the liver to healthy action in a marvelously short time.

**Jaundice**, the symptoms of which are familiar to all, is not of itself a disease, but a symptom of liver disease, to cure which follow directions for the cure of liver complaints.

**Costiveness.** An important office of the bile is to act as a laxative upon the bowels. When the liver becomes torpid or congested, it fails to discharge sufficient bile to insure a proper movement of the bowels. Costiveness is a result, but will readily yield to a medicine which will regulate the liver. (See Liver Complaints.) Costiveness, it may be remembered, is not of itself a disease, but an evidence of some internal derangement. If not overcome it will add to such derangement by preventing the escape of morbid matter through the natural channels, and thus force the diseased organs to do an unnecessary amount of work.

In whatever disease we are combating it is desirable to approach regularity of evacuations by using small doses of some mild cathartic until the Compound has restored the diseased organs, when the cathartic will be no longer needed. This advice should always be remembered, and followed in other as well as liver diseases.

MESSES. R. C. & C. S. CLARK: I have used two bottles of your Anti-Bilious Compound, and can cheerfully recommend it to all bilious subjects as being the best medicine I ever used for diseases of the liver.

Respectfully, yours,

F. B. STRANAHAN, Concord Station, Pa.

A MAN who grew rapidly fleshy finally found only two articles of his former wearing-apparel which he could wear. They were his spectacles and umbrella.

THE charitable give out at the door and God puts in at the window.

A PEDAGOGUE and his two A-B-C-darians: "Well, Andy, what is that letter?" "Don't know, sir." "That is W." "Double me." "Next! Peter, what letter is it?" "Double Andy."

SHOCKING business—cutting up corn.

HE that waits for a dead man's shoes may long go barefooted.

THE plow goes not well if the plowman holds it not.

PLUMBI swine is the latest for pigs of lead.

Who will not keep a penny, shall never have any.

DO WHAT thou ought, let come what may.

THE practical value of Mesmerism: Bunce declared that on a road where he used to live, in Michigan, there were a great many little stations where the train would stop if there were any passengers to get off. To avoid ringing the bell so often, the conductor would mesmerize the engineer when the train started, and afterward simply will that the train should stop or start.

THREE may keep counsel if two be away.

LOVE thy neighbor, but pull not down thy hedge.

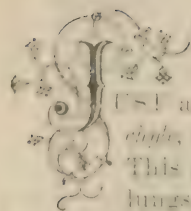

ZEAL without knowledge is fire without light.

THE blind man's wife needs no painting.

# THE BLOOD.

---

Just as the blood is about to enter the heart it receives *chyle*, which has been taken from the food by the lacteals. This chyle, with the blood, is sent by the heart to the lungs, where it receives oxygen from the air, and becomes arterial blood. It then returns to the heart, and is sent through the arteries to every part of the system. It is then forced through little, hair-like passages into the veins, to be returned to the heart. In making this minute passage from artery to vein it unloads nourishment and loads up with waste material, which is no longer needed, and which would act injuriously if allowed to remain.

This waste material is expelled from the blood in several ways, but chiefly by means of the liver. A healthy liver takes, each day, about two and a half pounds of this waste material and converts it into bile, which is used in the process of digestion, and to regulate movements of the bowels. When the liver fails to perform its healthy functions a large part of this impure matter is left in the blood.

Nature attempts to expel this poison through other channels.

**The lungs** and the kidneys are called upon to throw off more foul matter than they have been accustomed to, and, as they do so still more is required, till finally they sink exhausted under their load, unable now to do the amount required in health. The entire volume of blood (about four gallons) passes through the lungs every seven minutes, and, consequently, they are readily influenced by the character of the blood, which, if pure, will keep the lungs sound and healthy, but if diseased, will soon disease the lungs. The more unhealthy the blood is the more disastrous will be its effect upon the lungs, till it finally culminates in consumption: evidence of which may be found in the foul breath exhaled, and sensitiveness of the lungs to changes of the atmosphere.

RICHMOND CENTER, Ashtabula Co., O.

MESSRS. R. C. & C. S. CLARK—

*Gentlemen:* I had been out of health for years, till, reading one of your Almanacs for 1872, I approved of your theory, and at my earliest convenience purchased a bottle of Clark's Anti-Bilious Compound. I took it according to directions, and felt that it helped me. I then discontinued the use of it for a couple of weeks to satisfy myself that it was the effect of the Compound. I soon settled back again into my old habit of *scouring*, attended with other ill too numerous to mention. I commenced the use of the Compound again, and I think I can say *enough*. I enjoy better health than I had for several years, and hope that by a thorough course I may be entirely cured.

Yours, etc.,

JAMES HEATH

-----	----	-----	--	------	------	-------	------	------

WHEN some boys were displaying their physical activity, one declared that the others might stack chairs one upon another until they were six feet high, when, if they would allow him to take off his boots, he could jump over them. After the chairs were stacked, he deliberately pulled off his boots and jumped over them (the boots).

AN ounce of discretion is worth a pound of wit.

SQUIRRES' reason for taking the second drink before breakfast is, that the first drink makes him another man, and he likes to treat that other man.

IN the coldest flint there is hot fire.

ARTEMUS WARD lent two hundred dollars. When he learned his man was about to leave town, he reminded him of the debt, but informed him that, as he wished to be liberal, he would throw off one hundred dollars. The debtor expressed his appreciation of such liberality, and declared that he would not be outdone; he, though a poor man, would throw off the other hundred.

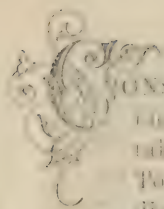

IN every country the sun riseth in the morning.

THE lady whose absent husband wrote loving letters, but sent no money, remarked that his love was *unremitting*.

A MUFFLED cat is no good mouser.

# CONSUMPTION.

CONSUMPTION is a form of scrofula, and is therefore, a blood disease. He who hopes to cure consumption by taking cough syrups must inevitably be disappointed. To cure consumption we must cleanse the blood. If the disease has so far advanced that there is not sufficient lung left to perform the function of respiration, the sufferer must die, but if only a portion of the lung is destroyed, further destruction may be prevented, and the remaining portion restored to healthy action by the use of Clarks' Anti-Bilious Compound, to cleanse the foul poison from the blood.

Clark's Anti-Bilious Compound will positively cure consumption in its first stage, and will greatly benefit, and sometimes cure, when the invalid has been given up by the physicians to die. We offer a reward of *one hundred dollars* for a case of consumption in its first stage which can not be cured by our Anti-Bilious Compound.

In all stubborn diseases, but more especially in consumption, attention should be given to "Special Directions" found on inside wrapper of each bottle. As the lungs perform an important part in keeping the blood healthy, it is desirable that they be able to present as much active surface as possible for the interchange of chemical elements between the blood and atmosphere.

R. C. & C. S. CLARK *Gentlemen*: I have had a *cough* for a long time, and am reduced almost to a skeleton. I have stopped all other doctoring, and have begun to take your Anti-Bilious Compound. I have taken one and a half bottles, and can see great improvement in my health—better sleep, better color, and less *cough*.

Yours respectfully,

ADAM BURWELL, Magnolia, O.

Your Anti-Bilious Compound did me a great deal of good, and helped my *cough* greatly.

S. LANDON, Dents Run, Pa.

MESSES. R. C. & C. S. CLARK: My wife has been troubled with a *bad cough* for two years. The cough was so bad that she had fears of consumption. She doctored with physicians for one year without relief. Her strength failed so that she could hardly do any kind of work.

She began to use your Anti-Bilious Compound in the summer of 1871. For the first week we could see no improvement, but before she had finished taking the first bottle her health began to improve. She continued to use the Compound till she was perfectly restored to health. She now weighs fifteen pounds more than when she began to take the Compound, and is in the best of health.

C. A. KNIGHT,

Firm of Thompson, Hart & Co., Cleveland, O.

MESSES. R. C. & C. S. CLARK *Gentlemen*: This may certify that I have been curing most all forms of chronic diseases in this city for the last twelve years, and I have seen the want of a medicine that is particularly designed to act upon the liver, stomach, spleen, alimentary canal, and general circulation. Last spring I had an attack of biliousness, dyspepsia, and general debility. I took three bottles myself, of your Anti-Bilious Compound, which *cured me and improved my general health*. I have recommended your Compound to a large number of my patients, who have taken it, and it has given entire satisfaction. It has accomplished all you promise, and much more. I think your Compound will prove a great blessing to the afflicted, and reward you for your labor and deep researches in preparing it.

Yours respectfully,

DR. A. W. TUCKER, Cleveland, O.

"How much grain did you raise this year?" said Flint to a Western farmer. "I raised two thousand bushels," was the reply. "Oh, pshaw!" said Flint, "I raised over one hundred thousand bushels." "Possible! How much land have you?" "Oh, none. I rent an elevator."

WHEN a dog is drowning, every one offers him water.

AN asthmatic individual apprenticed himself to an artist to see if he could learn to draw—his breath.

"WELL, Hannah, I am now convinced that your husband is a cannibal. I saw him, to-day, take Tom and Jerry into his stomach."

GRASP no more than thy hand will hold.

CROSSER are ladders that lead to heaven.

WHEN a wife elopes and takes bed and bedding, can the husband truthfully say she has left his bed and board?

A MAN lost a pistol and a pocket-book containing twenty-five dollars. The pocket-book was a present to him, and its loss grieved him much more than the loss of the money. So he advertised: "Lost—a pocket-book and pistol. Any person who will return them to this office will receive the contents."

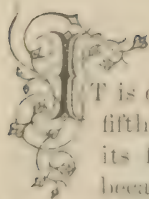

SLOGGS, upon his first visit to Providence, diligently inquired for the much-noted hand which he had heard belonged to that city.

A LOOKING-GLASS, like a wise man, says nothing, but reflects a great deal.

HE that would eat the kernel must crack the nut.

# SCROFULA.

It is estimated by an eminent medical writer that about one-fifth of the human race is affected with scrofula, in some of its forms. It usually attacks such organs as are unable, because of temporary weakness, to throw off the poison. Tubercular consumption, white swelling, hip disease, etc., are forms of scrofula. When this poison attacks glands just under the skin, it is then called king's evil, or scrofula proper. It most usually shows itself on the side or back of the neck.

It will require no argument to convince our readers that the only way to cure scrofula is to completely cleanse the scrofulous poison from the blood. To convince them that Clarks' Anti-Bilious Compound is the most powerful known remedy for that purpose, we would refer them to the testimony of physicians, and to those who have been cured by our Compound. Physicians say, "It would be difficult, indeed, to prepare a more efficient remedy for the cure of scrofula." "It is unrivaled for purifying the blood and curing scrofula." While those who have been cured by it are still louder in its praise.

Scrofula is a stubborn disease. The patient who is cured by using several bottles should feel perfectly satisfied with the result. During treatment, the sores should be cleansed twice a day with Castile soap-suds. The patient should take moderate exercise each day, and eat such food as best agrees with the stomach, avoiding fat and fatty meats, but eating all the salt called for by the stomach.

**White Swelling and Hip Disease.** The treatment of these diseases is the same as that described for scrofula. The joints diseased should not be moved while the sores are being cleansed with Castile soap-suds. It is not always possible to preserve a free use of the joint, but the chances are favorable if the joint is kept quiet and not used during treatment.

I hereby certify that I have examined the formula for Clarks' Anti-Bilious Compound, and I am satisfied that it is a superior medicine for the diseases for which it is recommended by the proprietors.

It would be difficult, indeed, to combine the medical agents which it contains in better form, or to prepare a more efficient compound for the cure of chronic derangements of the liver and of scrofula in its numerous forms.

A. LOGAN, M. D., Woodcock Borough, Pa.

MESSES. R. C. & C. S. CLARK—*Gentlemen*: I have examined the different articles that enter into your Anti-Bilious Compound, and, in consequence, have not hesitated to recommend it to my patients and others, who have not, in a single instance, been disappointed. You have, in my opinion, hit upon a valuable combination, which will recommend itself to public favor.

THOS. B. SHUGERT, M. D., Pleasantville, Pa.

# ERYSIPELAS.

---

UNDER the head of skin diseases some writers class erysipelas and several other diseases which clearly originate in a foul condition of the blood. Without questioning the propriety of such classification, we most emphatically assert that erysipelas is a disease of the blood, and that it can never be cured by external applications. With some people the inflammatory attacks are periodical, with others the attacks follow violent exercise or extraordinary excitement; while yet others are scarcely ever free from the external appearance of the disease. During the inflammatory condition much depends upon external treatment. The mucilage recommended in our "special directions" on inside wrapper of bottle, should be freely applied until inflammation is subdued, after which our Anti-Bilious Compound should be taken to cleanse it from the blood before a recurrence of the external inflammatory attack.

One of the proprietors of this medicine had erysipelas from the time he was seven years old until he began to take this Compound, in 1867. During that period he was never three months at a time free from an attack of erysipelas. It was a malignant form of the disease, and always attacked his face, frequently swelling so as to close one eye, and sometimes both. The attacks would usually last about one week. He has had but one attack since he began to use this Compound.

We believe it is not possible to find a case of erysipelas which this medicine will not cure.

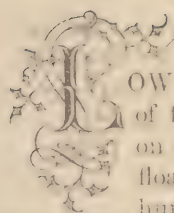

**Sore Eyes.** In addition to taking the Compound to purify the blood, bathe the eyes once or twice a day with one part Compound and two parts water. It will be found very beneficial.

**Salt Rheum** is another external affliction caused by impure blood, and, like the others, will cease to exist soon after beginning to take the Compound. Observe special directions on inside wrapper of bottle. To attempt to cure salt rheum by an ointment alone is nearly as absurd as to try to cure scrofula or catarrh by a local application. You will see, by the following testimony, with what dispatch the Anti-Bilious Compound cures this disease.

This certifies that I had been for years troubled every summer with an aggravated form of salt rheum. My wrists and hands would swell and crack open so badly as to cause me a vast amount of suffering. I used one bottle of Clarks' Anti-Bilious Compound, and was completely and permanently cured. There has never been a recurrence of the disease since I used the Compound.

PATRICK LEE, Titusville, Pa.

## FEVER AND AGUE.

OW, marshy ground is productive of the poisonous cause of fever and ague. Decomposition of vegetable matter on low, warm, damp land generates malaria, which floats in the air near the ground, and is taken into the human system through the lungs. It is also absorbed by water, and taken into the system through the stomach. This specific poison in the blood is completely neutralized by Clarks' Anti-Bilious Compound. It will cure every case where it is used according to directions. On the inside wrapper of each bottle are ample special directions for the cure of this disease.

While herding cattle in western Texas I was exposed to damp air and damp ground every night. When attacked by Indians, those of our company who escaped hastened to Shreveport, La. There I was attacked by the ague, and vainly tried every available remedy, without success. I finally managed to get to my home in Pennsylvania, and by request of my brother I began to take your Compound. When I had taken three bottles my chills were cured, but to make the cure permanent I took two bottles more. I had no return of the disease until last year, while I was night-watch on a railroad bridge. I then used two bottles, and was cured. I believe your Compound is a sure cure for fever and ague.

DAN. BLAKESLEE, Conneaut, O.

**Scaly Skin.** Some unhealthy substances are expelled from the blood through the skin. When such morbid element is of an acrid character, it irritates the skin, producing scaldiness and itching. When it occurs on the head, it is called dandruff; when elsewhere, it takes different names, according to its location. On the face it causes a rough appearance of the skin, which is very unpleasant; on parts protected by clothing, the tingling and itching are very annoying, especially to those of weak nerves.

Clarks' Anti-Bilious Compound, taken long enough to neutralize the injurious morbid element of the blood, will give the skin a smooth and clear appearance, and relieve the unpleasant itching.

**Nettle Rash** is caused by derangement of the digestive organs, and is easily cured by correcting such derangement.

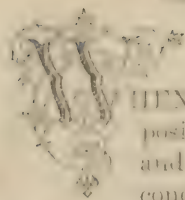

All skin diseases, which may be traced to some internal irregularity, may be cured by taking our Anti-Bilious Compound until the internal machinery is in good running order.

I have used Clarks' Anti-Bilious Compound in my practice, during the past few years, with marked success. I am opposed to the use of patent medicines whose composition remains a secret with the manufacturers. When I was first made acquainted with the formula of this Compound, I at once considered it a most happy combination of the best alteratives and tonics known to the Materia Medica, and I unhesitatingly recommend "Clarks' Anti-Bilious Compound" to the profession.

C. BIXBY, M. D., Spring Creek, Warren Co., Pa.

# GENERAL DEBILITY.

WHEN the blood becomes impoverished, and it fails to deposit the necessary constituents to rebuild the system and invigorate the vital forces, there follows a languid condition of the whole organism, which, for want of a better term, has been called general debility.

Some of the symptoms are wasting away of flesh, waxy paleness of skin, pallor of lips, pulse feeble, slow, and irregular, a sense of sinking or suffocation, short, hurried breathing, palpitation of the heart upon slight exertion, nervous exhaustion, melancholy, an "all gone" feeling, and a lack of energy, both mental and physical. Several of these symptoms will probably be present at a time.

Persons thus afflicted must avoid stimulating bitters, because, after the flash of undue strength which such stimulant gives has passed away, a depression follows which is much more lasting than the unnatural exhilaration.

Clarks' Anti-Bilious Compound will give strength to the vital forces, and render it lasting by enriching the blood and strengthening the digestive organs to keep the blood supplied with healthful food. Its salutary effect will be witnessed very soon after beginning its use. It is eminently successful in this condition of the system.

Messrs. R. C. & C. S. CLARK—*Gentlemen*: It is with pleasure that I make the following statement with regard to Clarks' Anti-Bilious Compound. In the spring of 1888 I was troubled with general debility. I was not down sick, still I had no feeling to work, being very weak and having no appetite. A friend advised me to take "Clarks' Anti-Bilious Compound." I procured two bottles, and had not used it one week before I began to feel better. By the time I had taken two bottles, I was strong and healthy as ever. Hoping that others may receive the same benefit from your valuable medicine, I remain, Respectfully yours,

D. W. ELDERKIN, Spartansburg, Pa.

R. C. & C. S. CLARK—*Gentlemen*: I had disease of the liver and kidneys. I had pain between my shoulder and in my side. My appetite was poor, and my food would not digest. From this general debility I have almost entirely recovered. I have taken your Anti-Bilious Compound, and have taken no other medicine, except a mild cathartic, as you direct. I regard your Compound as indeed a fine medicine.

Yours, with respect,

I. R. HEATH, Geneva, O.

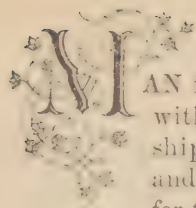

Messrs. R. C. & C. S. CLARK—*Gentlemen*: Having examined the formula for Clarks' Anti-Bilious Compound, I can testify that the ingredients entering into its composition are selected with great care from the *Materia Medica*, and, in my opinion, will fulfill the ends for which it is recommended.

M. L. FAULKNER, M. D., Venango Borough, Pa.

It is the best medicine I have ever taken. I consider it providential that I came in possession of your Compound.

ADDY VANNEST, Ursa, Adams Co., Ill.

## TO LADIES.

MAN is endowed with a constitution coarse and strong to withstand the atmospherical discords, and the hardships of business life, but woman is given a much finer and more delicate nature, not designed by our Creator for the heavier and more laborious duties of life.

Starting out in life with a disadvantage in point of endurance, she adds greatly to this disadvantage by her peculiarities in dress. While man wears easy garments, and plenty of them, she wears the thinnest of fabrics, and by a vice-like pressure compresses a portion of her frame within certain circumscribed limits, forcing elsewhere those internal organs which belong in the part thus compressed. While he protects his feet and ankles with an abundance of woolen and leather, her ankles are frequently covered with a single thickness of delicate stockings, and exposed to a temperature which would actually make a man shiver with cold.

When we consider this unwarranted carelessness and neglect of health, we can not wonder that female complaints are so very common. Among that class of women who work at out-door labor, and dress accordingly, we seldom find female difficulties. Preserve general health, and these diseases will not occur. Restore to health and strength, and these diseases will no longer torture their previous victims.

Clarks' Anti-Bilious Compound will restore healthy action to the various organs, and impart vigor to the whole system. We will give a reward of *fifty dollars* for a case of female weakness which it will not cure, if the weakness is not caused by some organic injury of the organs. Take small doses of the Compound at first, and gradually increase to a full dose, if no unpleasant feelings are produced by increasing the dose.

The following is from the wife of a well-known merchant in this city. Her name is purposely omitted, although she gave us permission to use it if we thought best.

"Since I was seventeen years old, I had at no time been healthy until restored to health by your Compound. I was troubled with weakness really all that time. Although at times I felt quite well, yet the slightest exertion would bring back the old malady.

"A sister-in-law of mine, who was also slightly troubled, informed me that your Compound, she believed, had cured her, for she had been well since she began to take it. I resolved to try it, and began at once. I took half a dozen bottles, and pronounced myself well. For awhile I was afraid to exercise violently, for fear of a return of the disease, but was surprised when I had thoughtlessly overdone, to find that I felt no ill effects. Your Compound has done a great work for me."

## NERVOUS HEADACHE.

---

ORMERLY those who suffered from nervous headache, after having tried almost every conceivable, external application, bore their sufferings with becoming resignation, believing nervous headache incurable because its cause could not be known. But a few years ago it was discovered that the brain and nerves give off to the blood a worn-out substance called *cholesterine*, which, in health, is separated from the blood by the liver, and is thrown with the bile into the duodenum, where it undergoes a change, and passes on as excrementitious matter. If this cholesterine is not thus disposed of, it acts upon the brain and nervous system as a poisonous, injurious body. It is a direct cause of nervous headache, and many other mental disturbances, among which are LOSS OF SLEEP, nervousness, loss of mental vigor, low spirits, gloomy forebodings, drowsiness, etc.

To cure nervous headache, and those other unpleasant symptoms, we must enable the liver to take from the blood this *cause* of headache. No medicine yet prepared, we believe, is equal to the task except Clarks' Anti-Bilious Compound. All recent discoveries in medical science were carefully studied during the preparation of this medicine, and the best combination perfected to overcome such diseases as had previously been very little understood. It will give sound sleep to the wakeful, and mental vigor to the drowsy.

A lady of this place was severely afflicted with periodical headache. After she had tried several physicians, and various patent medicines, I persuaded her husband to have her try your Compound. She has used four bottles; is still using it, and she has not had headache since she began its use.

E. E. ANDREWS, Druggist, Guilford, O.

MESSRS. R. C. & C. S. CLARK: I am now thirty-eight years old. I had been afflicted with nervous headache since I was thirteen years of age, until I began to use your Compound. Four bottles of your medicine have effectually cured me, and I am pleased to recommend it as the best medicine I ever used.

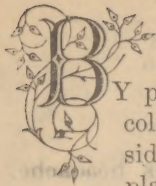

J. B. FURROW, Toledo, Iowa.

MESSRS. R. C. & C. S. CLARK. *Gentlemen*: I never took any other medicine that helped me like your Anti-Bilious Compound. When I commenced to take it, I could not stand on my feet one-half hour, and suffered severe pain by standing at all. My entire system seemed to be in a state of languor. I had neither strength nor ambition. I can not describe the sense of dullness and fatigue that I felt. I kept getting weaker, and my countenance was deathly pale. I had a great deal of pain in my back, and was obliged to keep as quiet as possible, for every exertion made the pain worse. I have taken three bottles of your Compound, and am well. I recommend the medicine to all ladies troubled with similar difficulty.

LUNA COBB, Jamestown, N. Y.

# SPINAL IRRITATION.

---

Y passing the fingers along the full length of the spinal column, pressing sharply on each projection, and on each side of the intervening spaces, you may find one or more places where such pressure will reveal considerable soreness—so much so that you involuntarily flinch when such pressure is made.

The spinal cord is part of the nervous system, and may be affected by whatever will cause nervous headache, or other nervous disorders; but the most usual cause for such spinal irritation, or soreness, is derangement of internal organs which receive their supply of nerves from the spinal cord. Disease interferes with a proper use of the nerve-force, and the difficulty is frequently communicated to the spine at the point where nerves are given off, supplying such diseased organ.

When the organ is restored to health, nervous equilibrium is again restored, and the soreness, or irritability, removed. While taking the Compound to effect this purpose, frequently rub the irritated spot with the bare hand.

---

In the beginning we told you that we do not recommend our Compound to cure ALL diseases, nor any disease which we do not positively know it will cure. Let the ignorant quack and designing knave tell that of their medicines, which they say they accidentally discovered or stumbled upon. They ask intelligent people to believe that their medicines contain an almost supernatural herb, known only to the manufacturer and to the inhabitants of a distant island.

Such dastardly humbugs have had their day. Beware of such unscrupulous impostors, and avoid their so-called medicines, which they admit are prepared without regard to scientific principles—that they are, in other words, *accidental, inharmonious conglomerations*.

If the inexperienced experimenter accomplishes any good at all by throwing together such a mass, may we not reasonably suppose that a harmonious combination, elaborated with an intimate knowledge of the chemical constituents and therapeutical properties of medical agents, will produce a better remedy? The exact proportions and the method of combination must be perfect to insure at once safety and power.

# EXTRACTS FROM BUSINESS LETTERS.

---

There is considerable excitement over your Anti-Bilious Compound since the reception of your Almanacs.

STEPHENSON & BRO., Freedom, Ind.

I think it is good, and will do good wherever used.

J. C. COLLIER, Jerome, O.

We are selling your Compound rapidly, and, as far as we learn, it gives satisfaction.

BROWN BROS., Wilmington, O.

We are having extensive sales on your Compound. Give quotations on five gross lots.

ZALRISH & PARTRIDGE, Geneva, N. Y.

We sell so much of your Compound that we think it will pay us to buy in gross lots.

WILKINSON & HARRINGTON, Fremont, Ind.

The sale of your Compound is rapidly increasing.

FULLER & FULLER, Chicago, Ill.

Your Compound seems to give better satisfaction than any other patent or proprietary medicine of the kind I ever handled.

E. F. BAKER, M. D., Kansas City, Mo.

We are selling your Compound with great success.

J. W. PENNELL & BRO., New Alexandria, O.

I have used your Anti-Bilious Compound with decided advantage.

REV. A. THOMPSON, Schellsburg, Pa.

I find good sale for your Compound.

W. B. HODGE, York, Ill.

The demand for your Compound is improving. It seems to give general satisfaction.

JUNKERMANN & HAAS, Dubuque, Iowa.

We are selling your Anti-Bilious Compound, and it gives very general satisfaction.

R. W. HUNTER, West Newton, Pa.

The sale of your Compound seems on the increase, and, from the favorable reports I have of it, I am induced to recommend it in my practice in some cases where I think it indicated.

JOHN S. CARTER, M. D., Erie, Pa.

Your medicine takes well, and, from my limited acquaintance with it, I am inclined to believe it a good preparation.

A. B. TRAVIS, M. D., Hamilton, Pa.

Clarks'

# Anti-Bilious Compound.

**PRICE, \$1.00 PER BOTTLE.**

Science has yet failed to discover another medicine equal in merit to Clarks' Anti-Bilious Compound, for curing diseases of the Liver, Stomach, and Blood.

It possesses most astonishing power to remove disease. It is entirely vegetable. Its ingredients are so happily combined that it possesses far greater curative power than any other medicine, and at the same time its taste is not in the least unpleasant.

While we do not claim that our Compound will cure all diseases, we do claim that it will cure all diseases which can be cured by giving health to the Stomach, Liver, and Blood.

## WE WILL GIVE,

\$100 for a case of Consumption (first stage) which it will not cure.

\$100 for a case of Catarrh which it will not cure.

\$50 for a case of Female Weakness which it will not cure.

\$50 for a case of Liver Disease which it will not cure.

\$50 for a case of Dyspepsia which it will not cure.

\$25 for a case of Sick Headache which it will not cure.

## NOTICE TO DRUGGISTS.

We do not print cards on Almanacs, nor send them to druggists for distribution, because we believe we can do better for all by superintending the distribution ourselves.

We do not make show cards this year.

We do not commission our Compound, nor receive orders for less than one gross.

*From these rules we never deviate.* We make this explanation, that druggists may be saved the trouble of writing to us for our preparation by the dozen, or on commission.

Our Compound may be bought in small or large quantities of almost any wholesale dealer in the principal cities, and of many in smaller towns of whom you buy other medicines. Upon application, we will send a circular giving the price at which our Compound is usually sold, and a list of several dealers of whom it may be bought.

We trust you may secure a small amount as soon as your customers desire it, and thus accommodate your patrons and be prepared for the increased demand.

**R. C. & C. S. CLARK, Operative Chemists,**

**CLEVELAND, O.**

Mr.

*John W. Love*  
*Locke & Sheldrake*
